

INDUSTRIAL MAINTENANCE MECHANIC

**Get job-specific training
and a cost-free education
while earning a salary.**

GASTON
COLLEGE

Apprenticeship 321

With the **Industrial Maintenance Mechanic** Apprenticeship 321 program, earn a Diploma in Industrial Systems Technology in just 2 years.

Industrial Maintenance Mechanics maintain and repair factory equipment and other industrial machinery, such as conveying systems, production machinery, and packaging equipment.

What Industrial Maintenance Mechanics Do*:

- Read technical manuals to understand equipment and controls
- Disassemble machinery and equipment when there is a problem
- Repair or replace broken or malfunctioning components
- Perform tests and run initial batches to make sure that the machine is running smoothly
- Adjust and calibrate equipment and machinery to optimal specifications
- Perform basic diagnostic tests
- Clean, lubricate and check performance of equipment or machinery
- Test malfunctioning machinery to determine if major repairs are needed
- Adjust equipment and reset or calibrate sensors and controls
